Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1 and 6 it is unclear just what is being reconstituted. Also, it is unclear how the consumer makes characteristics. Claims 11, 12, 13 "and/or" is indefinite. Claims 10, 14-18 the use of "or" is indefinite. Claims 17 and 18, the use of the word "may" leaves the claim indefinite because it is unclear if applicant is or is not claiming the recited element. Also, in claims 11 and 12 "any" is indefinite.

Claims 12 and 13, it is unclear how the availability of an interface effects the customizing process. Is applicant saying that availability is a matter of supply availability, then this is what should be said. Claims 10-18 are simply too confusing to sort out without further clarification and hence no action on the merits of these claims can be made at this time.

Double Patenting

Claims 1-18 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 1 of U.S. Patent No. 66598631 and 6615880 in view of Seo. Because Seo discloses a customization controller 5, the system in the foregoing listed patents could include such a controller for effecting customization of product.

Claim Rejections - 35 USC § 102

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1,2,3 6,8 are rejected under 35 U.S.C. 102(e) as being anticipated by Seo.

Seo disclose (a) preparing said consumer products (raw material) according to selections of product characteristics made by a consumer, (b) optionally reconstituting with one or more other components (adding either hot or cold water) , and(c) dispensing from a vending system at a point-of-sale of said consumer products(machine 1).

Multiple customization of product is read as being done successively and hence multiple processing. The reusable container is read as the cups.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Seo in view of Partyka et al.

As disclosed above, Seo answers the limitations of claims1 and 6. However, there is no teaching of remote controlling of ordering or of simultaneous ordering.

However, Partyka et al. do disclose using a remote controller which directs

Art Unit: 3627

communication with plural vending machines, and hence is able to effect simultaneous processing of plural orders. It would be obvious to modify Seo to include a remote controller which is connected to plural vending units so that simultaneous operations can be effected. The motivation for this would be to increase throughput.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication should be directed to Joseph A. Fischetti at telephone number (703) 305-0731.
